Property Taxes	\$1.5 million						
Payroll and Benefits	Almost \$13 million annually						

Operations

Consists of two dual fuel, coal/gas-fired steam generators, and utilizes natural gas for ignition/start-up.

Boiler water make up is demineralized from water supplied by the City of Chicago. Condenser cooling water is taken from the Chicago Sanitary and Ship Canal.

Fuel

Coal delivered by barge via the Chicago Sanitary and Ship Canal. Coal for Crawford is loaded into barges at Will County Station in Romeoville. The barge towing company delivers three to four barges daily and removes empty barges. Natural gas delivered by People's Gas.

Crawford Generating Station

*Committed to the community, the environment,
and the safe, reliable generation of electricity.*
